EDUCATION

California State University, Los Angeles

Bachelor of Science in Mechanical Engineering

Minor in Computer Science

Sept 2015 – May 2020

EXPERIENCE

TRAK Machine Tools/ Southwestern Industries, Rancho Dominguez, CA

Mechanical Engineer

Feb 2021 – Present

- Managing TRAK's product lifecycles through Engineering Change Requests and New Product Introduction
- Using SolidWorks to design new mechanical parts, assemblies, and systems for TRAK's CNC machines
- Creating Engineering BOMs with SolidWorks Professional Database Management and SolidWorks Manage
- Drafting 2D drawings to pass off to CNC machinists for the prototyping and production phase of a product
- Applying ASME Y14.5 guidelines for GD&T on mechanical drawings as and when necessary for critical parts
- Providing feedback to electrical engineers on the routing and installation of wires and cable assemblies
- Assisting senior engineers by 3D printing parts using different plastic materials and rapid prototyping them
- Communicating with multiple suppliers on CAD requests, quality assurance, and inspection procedures
- Setting parameters on 3D mechanical parts for Finite Engineering Analysis with SolidWorks Simulation
- Developing SolidWorks macros to automate repetitive tasks frequently done when 2D drafting or 3D modeling

Maxwell Vehicles, Los Angeles, CA (Remote)

Mechanical Engineering Intern

Aug 2021 – Nov 2020

- Designed shipping packages' parts and assemblies using SolidWorks for Maxwell's electric ProMaster (ePRO)
- Created build drawings for assemblies so a technician can construct the shipping packages multiple times
- Organized Bill of Materials for the ePRO shipping packages per the SolidWorks assemblies and requirements
- Worked independently while reporting to a supervisor daily on the project's progress, questions, and feedback

PROJECTS

Design and Fabrication of a Crash Sled System

Jan 2021 – May 2021

Senior Capstone Project, California State University, Los Angeles

- Led a team of 4 students to design and fabricate an crash sled system for a professor's research project.
- Utilized SolidWorks for the crash sled's design and drawing for the purpose of fabricating the mechanical parts.
- Conducted stress analysis on key components to ensure durability under operational conditions.

SKILLS

- **Softwares:** SolidWorks, Inventor, DraftSight, AutoCAD, MATLAB, Arduino, MS Suites
- **Programming Languages:** Java, Python, PHP, Visual Basic
- **AI:** ChatGPT, Microsoft Copilot
- **Technical Skills** 3D Printing, Data Acquisition, Data Management, Drafting, Prototyping
- **Languages:** English (Native), Spanish (Fluent), Portuguese (Fluent)

CERTIFICATIONS

- Engineer in Training (EIT), NCEES, Issued Feb 2020
- Certified SolidWorks Professional (CSWP), Dassault Systèmes, Issued Nov 2020
